

# CONVERTING SERVICES

---

Converting services are an ideal choice for a wide variety of markets, allowing manufacturers to meet application needs and enhance the production process with a customized solution. The Ellsworth Adhesives team is equipped to convert materials like thermal interface materials, tapes, films, EMI shielding products, sponges, foams, rubbers, packaging, and more from industry-leading suppliers.

No matter the size, shape, or style, we can work with you to create a material that fits your unique requirements. Our experienced engineers will partner with you throughout the converting process from design, to prototyping, to the completed product. As an ISO 9001:2015 & AS9120B certified company that offers ISO 10993 biocompatible products, your converted materials will adhere to strict guidelines to ensure consistent, high-performance results.

## Converting Capabilities

Rotary Die Cutting • Prototyping • Spooling • Rewind/Slitting  
Flatbed Die Cutting • Laser Cutting • Plotter Cutting • Island Placement  
Laminating • Digital Label Printing • Assembly & Packaging

# CONVERTING SERVICES

## Applications:

- Bonding & Attaching
- Cushioning
- Electrical Insulation
- EMI/RFI Shielding
- Precision Masking
- Sealing/Gasketing
- Sound & Vibration Damping
- Surface Protection
- Thermal Management
- Venting & Filtering

## Materials:

- Acoustic Mesh & Membranes
- Conductive Tapes
- Double Coated Tapes
- EMI Shielding Products
- Film Tapes (Polyester, Polyimide)
- Metal Foil Tapes
- PTFE Membrane Vents
- Rubber (Silicone, Neoprene, EPDM, Nitrile, Viton, Sponge Blend Rubber)
- Sponges & Foams
- Surface Protection Films
- Thermal Interface Materials
- Transfer Tapes
- UHMW Tapes
- VHB™ Foam Tapes

# WE ARE ELLSWORTH ADHESIVES

With 80+ experienced Engineering Sales Representatives in North America and 200+ globally, Ellsworth Adhesives provides solutions for converting services.
